

# COVID response

## Situation:

- Rural community hospital responds to a global pandemic.
- 78 fatalities within hospital.
- Communications is responsible for delivering live-saving information to 1,000 staff and a community of approximately 66,000 residents.
- Too much work to even quantify.
- My lasting legacy to this community.

50% to 80% of patients continue to have troubling symptoms three months after the onset of COVID, even after tests no longer detect the virus in their body.
